

China: massive antenna & 5G university network & ionosphere experiment

Question: if the massive antenna & the 5G uni network are both in Huazhong, what is the connection between the two??

22.2.19

A first 5G wireless network tested on a university campus has been set up at **Huazhong** University of Science and Technology (HUST)

(Orig. French – see translation attached <http://french.peopledaily.com.cn/n3/2019/0222/c31357-9548780.html>)

3.1.19

China has built a military radio antenna on a site 21 times the size of Paris

(Orig. French – see translation attached https://www.ulyces.co/news/la-chine-a-construit-une-antenne-radio-militaire-sur-un-site-de-21-fois-la-taille-de-paris/?fbclid=IwAR2M4YkZ54GKi9sr0vakvpS-AmhdK0ABwfg5_ZeKEwAYAk3HzWVag0z-kc8)

... The Chinese authorities have kept secret the precise location of the 2250 km² area where the antenna is located, but some sources estimate that it would be in the **Huazhong** region, where 230 million people live.

The first joint experimental results between SURA and CSES

doi: 10.26464/epp2018051

In June 2018, for the first time, the SURA heating facility in Russia , together with the in-orbit China Seismo-

Electromagnetic Satellite (CSES), carried out a series of experiments in emitting high frequency (HF) O-mode radio waves to disturb the ionosphere.
