

# Sri Lanka 5G

sundayobserver.lk – [NB this is about 5G and also Smart Meters. Smart grid concept to boost](#) power sector. Measures taken to boost Sri Lanka's power sector through the smart grid concept will drive sectoral growth. The country will have a strong power sector in keeping with global technological developments, said State Minister of Power and Renewable Energy, Ajith P. Perera at the inauguration of the annual conference of the Organization of Professional Associations of Sri Lanka held last week in Colombo.

“The road map to the smart grid concept was approved by the Cabinet of Ministers last week and the process is expected to be completed within the next five years. Sri Lanka will need 60,000,000 smart meters. Services of the current meter readers will be redundant in future. Pub 30 Sept 2018 Added 30 Sept 2018
