

PUBLIC HEALTH WARNING

ALL WIRELESS DEVICES EMIT MICROWAVE RADIATION—a known biological hazard

EVERY TIME YOU USE A WIRELESS DEVICE, YOU ARE EXPOSED TO MICROWAVE RADIATION.

The World Health Organization (WHO) labels this radiation a Class 2B possible cancer-causing agent in the same category as lead, DDT, and chloroform. Cell phones, cordless phones, tablets, laptops, 'smart' meters—the more you are around these devices, the more radiation you get.

MICROWAVE RADIATION IS HARMFUL TO YOU. Scientists link this radiation to diseases, both long-term and short-term: cancer, infertility, DNA damage, damage to fetuses, sleep problems, memory and behavior problems, heart problems and many others.

MANY PEOPLE HAVE BECOME "ELECTRO-HYPER-SENSITIVE" (EHS) and cannot tolerate even low exposures, seriously impacting their health, job, housing, and social lives.

GOVERNMENT REGULATIONS DO NOT PROTECT YOU. FCC guidelines were written decades ago and ignore current science linking microwaves to human disease. Cities like San Francisco have tried to introduce mandatory health warnings on cell phones but the wireless industry has suppressed these efforts with lawsuits and economic boycotts.

Electro-hypersensitivity Symptoms:

anxiety, sleep problems, fatigue, Irritability, burning sensation in the eyes, exhaustion, muscle and joint pain, dizziness, dry eyes restlessness, blood pressure problems, pain, forgetfulness, urinary urgency, Irritability, eye pressure, tinnitus, the head and the ears, tightness in chest, sensitivity, skin conditions, infertility arrhythmia, insomnia,

anomia (difficulty finding words), lack of energy, heart palpitations, blood pressure problems, autism, difficulty concentrating, joint headaches, depression, sensations of pressure in hyperactivity, noise cellular destruction, heart Restless leg syndrome

Ignoring it has a price.
