WORLD HEALTH ORGANISATION IS REVIEWING WHETHER SMARTPHONES MIGHT INCREASE THE RISK OF CANCER

<https://www.telegraph.co.uk/technology/2019/03/03/world-health-organisation-reviews-whether-smartphones-might/> (free sign-up required)

Excerpts (**read with caution!**): ... Other countries have been cautious with an Italian court forcing the government to fund a public awareness campaign over potential risks to health this summer. France has ruled that phone manufacturers must display the radio wave absorption rate (SAR) and test handsets to make sure they comply. Last year it found eight models on the market which did not. ... The advent of fifth generation wireless, of 5G, has sparked further debate over the impacts it could have on the population because the networks will require higher frequencies and more phone masts. ... **Simon Mann, head of radiation dosimetry at Public Health England said: "the overall exposure is expected to remain low relative to guidelines and as such there should be no consequences for public health."** ... Dr Rongen of ICNIRP, the organisation which is tasked with setting the limit at which phones can emit radiofrequency, that it would be "very difficult to predict" if there are any potential health hazards associated with the new network. **"It is not set up as a**

public health experiment but of course you can consider it as such. [Ed.: i.e. we are all guinea pigs in the biggest biological experiment in human history. Pity no one will be left to record the results for posterity as this experiment is likely to eliminate the possibility of there being any posterity.] It will be necessary to gain more information about the exposure and any health problems that might come from an effect of that exposure,” however, he added, “this is not any different to monitoring prescription drugs that we rely on”. [Ed.: Oh, really? Except that, of course, this time, we will be subjecting not just adults, children and foetuses, but the air, birds, animals, fish, insects, trees, food and water systems, everything on Earth, plus the ionosphere and magnetosphere to these “new prescription drugs”!! “Unconscionable”, “hubris” and “insanity” just don’t cover the scale of this! Anyone finding this remotely acceptable should be labelled beyond psychopathic and locked away where they can do no further harm to themselves or others!]. ICNIRP plans to relax the emissions limits ahead of 5G, which will grant telecommunication companies more leeway when designing the phone masts needed to provide coverage across the UK, US and Europe. ... In the late Nineties, studies by Sweden, Japan and other countries found higher risk of brain tumours in heavy users. However, scientists have not noticed [Ed.: very large numbers of scientists and doctors have noticed and are screaming at the tops of their voices!] increased rates of cancer in countries where smartphones have become ubiquitous.

PORTUGAL’S WINNING SONG FOR THE EUROVISION SONG CONTEST IS ABOUT MOBILE PHONES (TELEMÓVEIS)

Video: Telemóveis - Conan Osíris (subtitled music video)

<https://www.youtube.com/watch?v=hyLShzhQLZo>

Live performance

Conan Osíris - Telemóveis - Final | Festival da Canção 2019

https://www.youtube.com/watch?v=9t5_yUNp0bg

Translation of Telemóveis (Mobile phones) by Conan Osiris:

<i>I broke my cellphone Trying to call up to heaven To find out if I kill the longing/missing Or if I'm the one who dies</i>	<i>I'll break the cellphone Both yours and mine And I'll wreck my phone I want to live and obliterate my cellphone</i>
<i>And who kills whom? Who kills whom? Will it kill?</i>	<i>And if I break my cellphone I'll only break what's mine I have yet to see if my longing/missing will die Or if it turns out I'm the one who dies</i>
<i>Not even I know When I find out I won't call another soul</i>	<i>And who kills who I don't even know The snitches have never seen anyone be born</i>
<i>If life calls you up If life sends you a message If it doesn't stop</i>	<i>I used to break cellphones But I will never break mine anymore</i>
<i>And you don't have the courage to pick up You already know what is going to happen</i>	<i>I know that the longing/missing is dead</i>
<i>I'll go downstairs And I'll wreck my cellphone The ol'celly</i>	<i>The one who shot the arrow was me The one who shot the arrow was me</i>

[Ed. What about starting a “Smash-Your-Mobile-Phone” campaign to sync with this song and video?? Read this page to understand exactly why your cell/mobile phone is killing you and everything you love: <http://www.cellphonetaskforce.org/cell-phones-questions-and-answers-2/>]

5G-AUCTION BROUGHT 188 MILLION EUROS AND UNEXPECTED BIDDERS

7 March 2019 Des Standard, Austria (Orig. German - rough translation)

<https://derstandard.at/2000099096781/5G-Versteigerung-brachte-187-Millionen-Euro>

T-Mobile and "3" criticize "price gouging" — new mobile operators at the start

It can now go. As one of the first European countries, Austria has auctioned the necessary frequencies for 5G mobile communications. The state coffers brought the auction 188 million euros, 135 million more than budgeted by the government. For the buyers, however, there is a Chance to see some of their money again. In fact, the proceeds will be invested in the comprehensive expansion of fast Internet, explained the responsible Infrastructure Minister Norbert Hofer of the FPÖ. In fact, 5G is characterized by its speed with which data can be transmitted in real time. The technology is believed to replace the fixed network for the most part.

Not just the usual suspects

Surprisingly, mixed at the auction, not only the three major mobile phone network operators. In addition to A1, T-Mobile and "3", Salzburg AG, the Upper Austrian Liwest, Graz Holding and the mobile-discounted Spusu/Mass Response secured regional frequencies. The four new providers now want to set up their own networks. For example, Salzburg AG announced that it would invest a quarter of a billion euros in its 5G network in order to build a "Super WLAN" throughout Salzburg. Around Linz, Liwest wants to provide rural areas with faster Internet access. Spusu pursues similar plans in Lower Austria and Burgenland. In Graz, 5G is to be used for traffic control or for health and safety applications.

Competition

Four new providers are good news for consumers. They guarantee a high level of competition.. They guarantee a high level of competition.

5G Frequenzauktion

Versteigerungserlöse des Bundes – Gesamt rund 188 Mio. Euro

The old-established mobile operators A1, T-Mobile and "3" acquired frequencies, which are distributed throughout Germany. Company spokeswoman Livia Dandrea-Böhm told the STANDARD that A1 is now starting to build the network. First 5G phones have been introduced in the past few weeks

Next round in 2020

The auction was significantly cheaper for the industry than for the predecessor technology LTE (4G) in 2013. At that time, mobile operators spent more than 2 billion euros on licences. This is because the frequency spectrum is not suitable for the structure of a nationwide mobile network. The band 3.4 to 3.8 Gigahertz (GHz) has poor propagation characteristics, but allows for high bandwidths, so it is well suited for high internet speeds in metropolitan areas. Next year, in a Multiband auction also bands (700, 1.500 and 2.100 Megahertz) are auctioned, which allow a more extensive supply. There is no minimum bid for the auction in the spring of 2020, which is

Zum Vergleich: LTE-Auktion 2013

Gesamt 2,0 Mrd. Euro

budgeted by the government for 350 million euros.

The frequencies are connected to supply requirements, from 31. As of December 31, 2020, 989 radio stations [Funkstationen] must be in operation, as of June 30, 2014. June 2022 it must be 3,264. The majority of the requirements relate to A1, T-Mobile and "3" with initially 303 and later 1,000 sites. In most cases, it is a matter of retrofitting existing transmission masts.

T-Mobile and "3" criticize price drivers

The telecom authority RTR, which is responsible for the 5G frequency auction, has been satisfied with the result of the auction. "From our point of view, this price reflects the value the tenderers have given to the frequency spectrum. At this price supply and demand have been made," said RTR CEO Johannes Gungl after the auction.

Criticism came from mobile phones T-Mobile and "3". They talked about pricing. According to "3"-Chief Jan Trionow "individual actors have driven the prices in certain regions, to the height - although they had no real interest in it". Telekom Austria CEO Thomas Arnoldner was pleased with the outcome of the auction. The auction had been held on 12 February and lasted about three weeks. It took place under strict conditions. The exact date was kept secret in advance.

EUR 6.6 billion in Italy

In April 2018, the British state collected almost 1,6 billion euros with the auction of new mobile frequencies. Italy had taken 6.6 billion euros in October. In Switzerland, around 380 million Swiss francs (335 million euros) were raised at the auction this February. In Germany, the award will start in March.

QUESTION ASKED IN UK PARLIAMENT ON 5G SAFETY

28 February 2019

Opposition party shadow minister asks Health Minister about 5G safety

<https://www.theyworkforyou.com/wrans/?id=2019-02-25.225439.h>

Andrew Gwynne Co-National Campaign Coordinator, Shadow Secretary of State for Communities and Local Government - To ask the Secretary of State for Health and Social Care, what assessment he has made of the public health risks of the full roll-out of 5G.

Answer: Steve Brine, Parliamentary Under-Secretary for Health and Social Care

Electromagnetic fields (EMFs) and health evidence reviews have been prepared by scientific expert groups in the United Kingdom and around the world. The independent Advisory Group on Non-ionising Radiation (AGNIR) published their report in the UK in 2012 and the European Commission's Scientific Committee on Emerging and Newly Identified Health Risks (SCENIHR) published their report in 2015. The World Health Organization is also currently preparing a review. The AGNIR report is available to view at following link:

<https://www.gov.uk/government/publications/radiofrequency-electromagnetic-fields-health-effects>

The SCENIHR report is available at the following link:

https://ec.europa.eu/health/sites/health/files/scientific_committees/docs/citizens_emf_en.pdf

Based on the accumulated evidence and reviews, Public Health England (PHE) advises that the guidelines of the International Commission on Non-Ionizing Radiation Protection (ICNIRP) should be adopted and currently there is no strong evidence that EMF exposures below the ICNIRP guideline levels cause adverse health effects.

PHE has committed to keeping emerging evidence under review and to preparing another comprehensive review when sufficient new evidence has accumulated.

Please write to Andrew Gwynne, Shadow Secretary of State for Communities and Local Government and Labour MP for Denton and Reddish, informing him of the information below:

@GwynneMP <https://facebook.com/GwynneMP> or via

https://www.theyworkforyou.com/mp/11531/andrew_gwynne/denton_and_reddish

How dare Brine cite AGNIR when it has now been disbanded due to its exposure as corrupt and dysfunctional? (<https://truepublica.org.uk/united-kingdom/mobile-phone-cover-up-govt-advisory-body-disbanded-inaccurate-and-misleading-conclusions-remain/>)

How dare Brine cite ICNIRP when it has now been definitively exposed as corrupt?

(<http://www.cqlpe.ca/pdf/5G-mass-experiment-ICNIRP-cartel-Investigate-Europe.pdf> and

NEW FCC ORDER ALLOWS PRIVATE WIRELESS COMPANIES TO STRIP POWER FROM LOCAL AUTHORITIES

2 March 2019

A recent order from the FCC streamlines the ability of private wireless companies to install technology infrastructure, including small cells (akin to mini cell phone towers), in cities in towns. Now, officials around the country are condemning the new policy, perhaps nowhere more strongly than in Seattle, where Mayor Jenny Durkan and City Attorney Peter Holmes recently announced that they would appeal the order in federal court.

<https://www.naturalhealth365.com/fcc-5g-wireless-2892.html>

MESSAGE FROM LAWYER STEFANO BERTONE FOR THE [Mobile World Congress] PRESS CONFERENCE IN BARCELONA (IN ENGLISH)

https://www.youtube.com/watch?v=ITbYiCFzFkY&feature=youtu.be&ct=t%28EMAIL_CAMPAIGN_7_9_2018_7_57_COPY_01%29

Message from Mr Stefano Bertone, one of the lawyers who has just obtained the conviction of the Italian state to launch a national information campaign on the health risks associated with the use of mobile phones. This message was intended for the press conference held in [#Barcelone](#) during [#MWC19](#) [#Phonagate](#)

DEAR "OLIVE": ANOTHER MOTHER REPLIES TO A RECENT READER'S LETTER ABOUT PROTECTING OUR CHILDREN FROM 5G HARM

3 March 2019

<https://digitalsurvivor.uk/2019/03/03/dear-olive/>

Dear "Olive",

Reading your messages, I saw myself. I used to feel like you do now. I was frightened, desperate for information, for knowledge about how to protect myself and my children. I looked at their fat delicious faces and growing bodies while they were sleeping and I cried. I had put them in harm's way; putting wi-fi in the house, letting them play with my smartphone, letting them talk to Daddy and Granny with the phone right up against their heads.

Every so often I would hear a doctor or someone from the government on the TV or radio saying that there was no evidence that it causes cancer.

But all the while the little voice in my head was getting louder: asking if I was sure that this was safe; that when it comes to the growing brains and bodies of the most important things in my world, maybe it's better to err on the side of caution; that "no evidence of harm" isn't the same as "evidence of no harm"; that maybe, as with everything that a parent has to think about these days, I needed to do my own research and make a properly informed decision. ...

CHINA: MASSIVE ANTENNA & 5G UNIVERSITY NETWORK (BOTH IN HUAZHONG?), & IONOSPHERE EXPERIMENT

22 February 2019

A first 5G wireless network tested on a university campus has been set up at Huazhong University of Science and Technology (HUST)

(Orig. French <http://french.peopledaily.com.cn/n3/2019/0222/c31357-9548780.html>)

China has built a military radio antenna on a site 21 times the size of Paris

3 January 2019

(Orig. French - https://www.ulyces.co/news/la-chine-a-construit-une-antenne-radio-militaire-sur-un-site-de-21-fois-la-taille-de-paris/?fbclid=IwAR2M4YkZ54GKi9srOvakvpS-AmhdK0ABwfG5_ZeKEwAYAk3HzWVagOz-kc8)

... The Chinese authorities have kept secret the precise location of the 2250 km² area where the antenna is located, but some sources estimate that it would be in the Huazhong region, where 230 million people live.

China Builds Experimental Antenna Five Times the Size of New York City in Secret Location
<https://www.newsweek.com/china-giant-antenna-navy-submarine-new-york-city-secret-location-1276332>

CHINA AND RUSSIA HAVE MODIFIED THE ATMOSPHERE ABOVE EUROPE TO TEST POSSIBLE MILITARY APPLICATION, SCIENTISTS SAY
<https://www.newsweek.com/china-russia-modified-atmosphere-europe-military-application-1262349>

The first joint experimental results between SURA and CSES

doi: 10.26464/epp2018051

In June 2018, for the first time, the SURA heating facility in Russia , together with the in-orbit China Seismo-Electromagnetic Satellite (CSES), carried out a series of experiments in emitting high frequency (HF) O-mode radio waves to disturb the ionosphere.

HEALTH HAZARDS OF 5G TONIGHT IN THE COUNCIL (Orig. DUTCH – rough translation)
GEZONDHEIDSGEVAREN VAN 5G VANAVOND IN DE RAAD

28 February 2019

<https://zaanstad.nieuws.nl/actueel/29295/gezondheidsgevaren-van-5g-vanavond-in-de-raad/>

NETHERLANDS: Health hazards of 5G tonight in the council - Zaanstad Nieuws, 28th February 2019 (auto-translation)

Two worried residents speak tonight to the city council about the health risks of 5G internet and smart networks , where scientists from all over the world now have their questions.

Nikai de Best, a health coach who has been studying the health effects of radiation for the last two years and Hannah Hordijk, health scientist and 'extra interested in the subject on the basis of personal complaints', this time the council members want to personally point to the enormous risk that the rollout will take place. of 5G represents our health and that of our planet '. Anouk de Bont of Let's Talk About Tech also comes along.

Previously, Let's Talk About Tech sent all council members all the 5G Space Appeal, an alert signed by more than 40,000 doctors, scientists, environmental organizations and others. On 26 November last year, 164 scientists and doctors, along with 95 non-governmental organizations, signed a call to develop new medical guidelines that reflect the state of medical science and are truly protective.

Outdated guidelines

The ICNIRP guidelines on which the Health Council relies date back to 1998 and have been controversial since the moment of adoption, according to the latter call. They are based on the warming effects in six minutes, but in everyday life everyone is exposed to radiation from many different sources simultaneously 24 hours a day and seven days a week. Last year, after a protest by worried citizens, the smart street lamp finally came out in Utrechtse Heuvelrug.

Together with Investigate Europe, De Groene Amsterdammer researched the 5G roll-out process and revealed how radiation standards still apply in the Netherlands despite increasing scientific criticism and how conflicts of interest play a role in this. Of the higher frequencies of 5G, no studies have shown that they are not harmful, but it has already been calculated that they can permanently damage skin tissue, so the board will be presented tonight.

Questions for the council

The parties also have a number of questions for the local representatives:

- Do you agree with us that we should not roll out a 5G preventive and wait until proven conclusively by independent researchers that this does not cause health damage to humans and their environment?
- Who is now and later responsible and ultimately responsible for the amount of radiation in our municipality and on what basis?
- Who is now and later within the municipality co-responsible and responsible for any costs if residents have demonstrable radiation complaints?
- What concrete additional research will you do on this subject, how and when, and who do you involve?

In addition to an at least provisional point behind the rollout of 5G, the parties ask for more attention to the subject of radiation in general. The Health Council has already stated that residents

must be involved in the installation of an antenna installation in their living and working environment and also states that complaints must always be taken seriously. Municipalities are also not obliged to cooperate with the placement of antennas. Below is a screenshot of the Antenna register of the National Government, on which the safe distance of each antenna can be found [please see the article itself for this].

UN ÉMINENT PROFESSEUR DE BIOCHIMIE MET EN GARDE : LA 5G EST « L'IDÉE LA PLUS STUPIDE DE L'HISTOIRE DU MONDE »

<http://lesmoutonsrebelles.com/un-eminent-professeur-de-biochimie-met-en-garde-la-5g-est-lidee-la-plus-stupide-de-lhistoire-du-monde/>

English article: <https://www.wakingtimes.com/2019/02/20/biochemistry-professor-warns-5g-is-the-stupidest-idea-in-the-history-of-the-world/>

Vidéo: <https://www.youtube.com/watch?v=GE0yydGI3BE>

Le déploiement international de la technologie sans fil de cinquième génération (5G) est en cours malgré l'opposition de plus en plus vive des scientifiques et des professionnels de la santé, qui tentent désespérément de nous avertir des dangers bien documentés de la 5G. Le gouvernement et les industries impliquées dans le déploiement de la 5G n'ont aucune préoccupation pour la sécurité publique car cette technologie promet d'être exceptionnellement rentable, tout en précipitant tout le monde dans cette technocratie émergente.

S'ajoute à la dissidence, Martin L. Pall, docteur et professeur émérite de biochimie et de sciences médicales de base à la Washington State University. Dans une étude et une présentation, il examine de plus près la technologie 5G et lance un avertissement majeur pour nous tous. ... Il discute ensuite de huit façons dont cette technologie nuit à la santé humaine, en s'appuyant sur une documentation scientifique exhaustive :

1. Fertilité réduite
2. Effets neurologiques / neuropsychiatriques
3. Dommages à l'ADN cellulaire
4. Apoptose – Mort cellulaire programmée
5. Stress oxydant et dommages des radicaux libres
6. Effets endocriniens (hormonaux)
7. Excès de calcium intracellulaire
8. Cancer

Dans sa conclusion, Pall n'a pas mâché ses mots pour décrire la 5G : « **Le déploiement de la 5G est absolument insensé.** » La présentation qui suit est particulièrement utile pour quiconque souhaite mieux comprendre de quoi il s'agit et comment le combattre.

VIRGIN GALACTIC TAKES FIRST HUMAN PASSENGER INTO SPACE (VIDEOS)

23 February 2019

<https://www.rt.com/news/452234-virgin-galactic-first-passenger-space/>

Excerpts: According to NASA and US military standards, which say space begins at a 50-mile (80.5km) altitude, the craft entered space and the three-person crew became the 569th to 571st people to cross that frontier. The flight reached a height of 55.8 miles (89.9 km). ... Founded in 2004, Virgin Galactic is developing commercial spacecraft to provide suborbital spaceflights to space tourists at a cost of \$250,000 a pop. It also plans to carry out suborbital launches for space science missions.

RUSSIAN SPACE CHIEF SAYS SECURITY PEOPLE TOO TWITCHY ABOUT ONEWEB GLOBAL INTERNET PROJECT (RUSSIA TODAY (RT))

10 January 2019

FILE PHOTO. A model of a OneWeb satellite. ©Global Look Press via ZUMA Press / Kim Shiflett

Excerpts: Russia may deny OneWeb access to its territory for building ground infrastructure, but cannot force its neighbors to do the same, Rogozin pointed out. ... Russian is providing launch vehicles to place some of the OneWeb satellites into orbit. ... The FSB's complaints about OneWeb focus on the fact that Russia has no way to ensure that the constellation would not be used for surveillance purposes. ... Objections to OneWeb have also come from telecommunications watchdog RKN, which said it would have no way of enforcing restrictions on access to content as mandated by law once the constellation is operational. ... OneWeb and Roscosmos have a joint enterprise which was established in 2017 with the goal of streamlining Russia's participation in the project. According to Rogozin, Russia is considering buying a greater share in the company, from 40 percent to over 50 percent. The joint company is currently seeking a broadband license necessary to operate OneWeb equipment in Russia.

HOW 5G WILL COST YOU WHAT'S LEFT OF YOUR PRIVACY

3 March 2019

<https://digitalsurvivor.uk/2019/03/03/how-5g-will-cost-you-whats-left-of-your-privacy/>

Our lives are other people's business, thanks to digital technology. This modern-day phenomenon will increase once 5G becomes the norm.

NEUE MOBILFUNKGENERATION – WAS WIRD 6G KÖNNEN?

30 November 2017

<https://www.ingenieur.de/technik/fachbereiche/ittk/neue-mobilfunkgeneration-was-wird-6g-koennen/>

Während wir noch das Mobilfunknetz der 4. Generation nutzen und über 5G sprechen, wird in den Laboren und Büros der Wissenschaft schon an 6G geforscht. Denn dafür müssen neue Frequenzen ebenso her wie drahtlose Übergänge.

New mobile phone generation - what will 6G be able to do? (Orig.: German)

While we still use the mobile network of 4. Using the latest Generation and talking about 5G, 6G is already being researched in the laboratories and offices of science. For this, new frequencies have to come as well as wireless transitions. ...

IS 5G THE NEXT ASBESTOS?

2 March 2019

<https://digitalsurvivor.uk/2019/03/02/is-5g-the-next-asbestos/>

Many families in Northern Ireland have lost loved ones as a result of asbestos-related illness. Compensation for the victims and their families has not been easy to come by, particularly since the companies' insurers have fought tooth and nail to limit payouts.

Now public health experts are warning that the new 5G technology could be "the next asbestos".

TRUMP TWEETS IN FAVOR OF RISKY AND HARMFUL 5G AND 6G TECH DESPITE OPPOSITION FROM SECURITY EXPERTS, DOCTORS, ELECTED OFFICIALS, ENVIRONMENTALISTS, SCIENTISTS, ETC.

3 February 2019

<https://stillnessinthestorm.com/2019/03/trump-tweets-in-favor-of-risky-and-harmful-5g-and-6g-tech-despite-opposition-from-security-experts-doctors-elected-officials-environmentalists-scientists-etc/>

5G: HARMFUL EFFECTS OF A NEW TECHNOLOGY

21 February 2019 by Jon Rappoport

<https://jonrappoport.wordpress.com/2019/02/21/5g-harmful-effects-of-new-technology/>

Excerpts: A few of the many corporations involved include Samsung, Intel, Qualcomm, Nokia, Huawei, Ericsson, ZTE. This is a global operation, and many governments are backing the push. And the consumer gets what? The ability to watch the reruns of Law&Order he's already watching? His current TV reception isn't good enough? The appliances in his home will all be connected to Internet and talk to each other and spy on him and record his energy use, in conjunction with smart meters, for the Greater Good. ... A recent New York study which experimented with 60GHz waves stated that "the analyses of penetration depth show that more than 90% of the transmitted power is absorbed in the epidermis and dermis layer."

"The effects of MMWs [millimeter waves] as studied by Dr. Yael Stein of Hebrew University is said to also cause humans physical pain as our nociceptors flare up in recognition of the wave as a damaging stimuli. So we're looking at possibilities of many skin diseases and cancer as well as physical pain to our skin."

"A 1994 study found that low level millimeter microwave radiation produced lens opacity in rats, which is linked to the production of cataracts."

PLUMMETING INSECT NUMBERS 'THREATEN COLLAPSE OF NATURE'

Exclusive: insects could vanish within a century at current rate of decline, says global review

10 February 2019

<https://www.theguardian.com/environment/2019/feb/10/plummeting-insect-numbers-threaten-collapse-of-nature>

Why are insects in decline, and can we do anything about it?

Excerpt:

The world's insects are hurtling down the path to extinction, threatening a "catastrophic collapse of nature's ecosystems", according to the first global scientific review.

More than 40% of insect species are declining and a third are endangered, the analysis found. The rate of extinction is eight times faster than that of mammals, birds and reptiles. The total mass of insects is falling by a precipitous 2.5% a year, according to the best data available, suggesting they could vanish within a century.

The planet is at the [start of a sixth mass extinction](#) in its history, with [huge losses already reported in larger animals](#) that are easier to study. But insects are by far the most varied and abundant animals, [outweighing humanity by 17 times](#). They are "essential" for the proper functioning of all ecosystems, the researchers say, as food for other creatures, pollinators and recyclers of nutrients.

GLASGOW'S STREETS BADLY IRRADIATED

17 February 2019

<https://digitalsurvivor.uk/2019/02/17/glasgows-streets-badly-irradiated/>

Digital Survivor measured electromagnetic radiation levels yesterday on two of Glasgow city centre's pedestrian precincts. Prepare to be shocked!

5G TECHNOLOGY – ABOVE OUR HEADS AND UNDER OUR NOSES (photos)

3 March 2019

<https://digitalsurvivor.uk/2019/03/03/5g-technology-above-our-heads-and-under-our-noses/>

Rollout of 5G is scheduled for 2020 and the technology is being put in place now. Digital Survivor's L. O'Connor reports on what some of this technology will look like.

3. 5G EVENTS

■ PAST

CONFERENCE FOR A 5G-FREE POLAND TOOK PLACE ON 28 FEBRUARY 2019

<http://mywolniludzie.net/wydarzenia/polska-strefa-wolna-od-5g-miedzynarodowa-konferencja-krakow-luty-2019/?fbclid=IwAR06jJ2PM8jODbfzO6ERCF9M1rzBI3s2kYZULepPrzbdSQqWTtPNiL5f7s>

The one-day conference was organised by Sir Julian Rose and his wife Jadwiga, who ran a successful campaign in the 2000s to keep Poland GMO-free. Attendance was high, including two Polish politicians, and the conference was live-streamed on NTV. Presentations were given by scientists, including Barrie Trower (see below and <https://www.youtube.com/watch?v=DLVlbPtNrVo>), and by activists, including Claire Edwards, who represented the International Appeal to Stop 5G on Earth and in Space (see below and www.youtube.com/watch?v=2rq6khEuNLM). Concerned citizens were also given an opportunity to voice their indignation and express their ideas for action. The conference was uplifting and motivating for all concerned. We need more such conferences around the world. **Please consider organising A STOP 5G CONFERENCE in your area.**

■ UPCOMING

Two German conferences - more information as of 15 March 2019 at <https://ul-we.de/veranstaltungs-ubersicht/>

5G SMART IN THE FUTURE? - OPPORTUNITIES AND DANGERS OF THE NEW WIRELESS TECHNOLOGY

Sunday 19.05.2019 Munich area

Sunday 02.06.2019, Bodensee area

Robin des Toits

ASSEMBLEE GENERALE ORDINAIRE EXERCICE 2018

Samedi 30 mars - 14h30 - Lyon, Maison de l'Environnement

www.robindestoits.org

STOP 5G ORGANISING IN UK

Ian R. Crane announces STOP 5G organising in the UK (starts at 15 : 31)

<https://www.youtube.com/watch?v=AsPU-MF2-1Q>

5G awareness event to be held in North-East England: Wed, 27 March – the following day Mark Steele due in court for appeal against his criminal conviction for “harassing” Gateshead councillors, i.e. warning the unsuspecting public.

UPCOMING MEDITATION

Global meditation on 20 March. Please start planning your own meditation for that day. It's about visualising the healthy, happy world we want to see around us. More information in upcoming newsletters. Next meditation date 25 May 2019: International Day Against Global Electromagnetic Pollution. Contact details for International Day: @O_Grigoriev (Twitter).

INTERNATIONAL DAY AGAINST GLOBAL ELECTROMAGNETIC POLLUTION: 25 MAY 2019

The purpose of the International Day Against Global Electromagnetic Pollution is to declare that technologies must be safe for all people, nature and the magnetic field of the Earth.

<http://www.tesla.ru/index.html>

People, plants, animals and even beetles are all connected with the Earth by a natural electromagnetic field. The Earth is also connected to the Sun by an electromagnetic field. We do not feel electromagnetic fields when they are natural. Just as we do not sense oxygen while we are alive. And just as we do not feel the Earth until we lift away from it.

Electromagnetic pollution is a term proposed by the World Health Organization. It has become a global environmental factor over the past 25 years. Electromagnetic pollution adds up to air pollution, which means that the air itself becomes dangerous. Electromagnetic radiation is more insidious than radiation from an atomic bomb because it comes with technologies that make our lives more convenient and comfortable.

Josh Del Sol - The Truth About 'Smart' Meters

28 February 2019

<https://takebackyourpower.net/the-truth-about-smart-meters-presentation-josh-del-sol/>

In this video, Josh outlines the 'smart' meter situation in detail.

As he connects the dots, the dark underbelly of the 'smart' meter agenda becomes exposed for all to see: **utility corruption, fatal fires, billing scams, unlawful surveillance and health risks** from **voltage transients** and **pulsed wireless radiation**.

The result of the ill-advised, haphazard deployment of 'smart' meters is now coming into view: a **hornets' nest of liability** for utilities, utility commissions and governments.

This has led to utility commissions [increasingly rejecting](#) utilities' meter deployment/upgrade plans; and an admission that the agenda is [topping out at 50% installation](#) across the USA and other countries.

A window of opportunity is opening to return to safe utility metering technology — but the people will need to continue to come together and engage in solutions.

With this as one of our shared objectives, I invite readers to [join 25,000 other like-minded souls in our solutions-oriented community](#). New subscribers will receive my free guide to quickly reduce EMF exposure.

Membre de l'ONU - La 5G est une guerre contre l'humanité

<https://www.youtube.com/watch?v=Qq9Rxg4fJ44>

Claire Edwards, membre du personnel de l’ONU, a lancé cet avertissement fort aux membres de haut rang des Nations Unies, qualifiant la 5G de « guerre contre l’humanité ».

Dr Martin Pall au National Institutes of Health - Le déploiement de la 5G est complètement fou

<https://www.youtube.com/watch?v=GEOyydGI3BE>

Le déploiement international de la technologie sans fil de cinquième génération (5G) est en cours malgré l’opposition de plus en plus vive des scientifiques et des professionnels de la santé, qui tentent désespérément de nous avertir des dangers bien documentés de la 5G. Le gouvernement et les industries impliquées dans le déploiement de la 5G n’ont aucune préoccupation pour la sécurité publique car cette technologie promet d’être exceptionnellement rentable, tout en précipitant tout le monde dans cette technocratie émergente.

VIDEO IN ENGLISH & POLISH

5G Gigantic health hazard - Barrie Trower & Sir Julian Rose

14 December 2018

<https://www.youtube.com/watch?v=DLVIbPtNrVo>

Excerpt: This is all over the world. I suspect from my travels that 58 per cent of the planet are taking avoidance action to prevent this happening. When I talk to royalty and leaders of government of peoples, in the last couple of years, 17 countries have started to take very serious avoiding action. 42 per cent of the planet, to my knowledge, is not. This is being really forced out and it’s going into nurseries, schools, houses ... It’s going everywhere, absolutely unrestricted – you can’t complain about it. So you do have an imbalance, and when you look at – we know the uterus can absorb 20 per cent more radiation (plus) than the rest of the body because of the moisture content. We know that you can have 40 per cent more damage in the uterus. We know that the uterus does not have – they’re called protein 53 and the nuclear pore complex. The uterus does not have the immune system that adults have for defence against this. Cells can be programmed to produce cancer. We know that the thymus gland, within the first eight weeks ... can be destroyed to develop the child’s immune system up to adolescence. Many years ago I read a paper that said that ladies who were exposed to a dose that an ordinary schoolchild can get today in a hospital using a diathermy machine, which used the WiFi frequency - the machine malfunctioned and the hospital staff from there, 47.7 per cent of the staff had miscarriages in the first seven weeks of pregnancy. Now, knowing that children can absorb much more radiation than adults because of their size (they’re nearer the wavelength which is the resonant frequency). If you do the calculations, the 47 per cent can become 67.7 per cent of children having birth defects – this is just from background. This was published by the World Health Organization first. Recently,

the European Academy for Environmental Medicine came up with 48 per cent. Now, If you add at least 20 per cent for children – this is where you're getting your birth defect rates, where, in three generations, just 50 to 60 years, only one in eight of your children can be guaranteed to be born healthy. And it is all mammals because we all have the same genetic code. The same four chemicals. Any tree can read your DNA sequence – we all have the same language and all mammals will suffer this. So the 42 per cent of the world where this is being forced out and this is provable. It was forecast – planned, documented, forecast, especially your big conference In Warsaw in 1973, they listed 88 categories, the whole paper is top secret – you are still not allowed to see it to this day. They predicted that your country [Poland] would be destroyed from microwaves. The effect is known, it is happening, it is documented. And it is being forced out – and your politicians do not know this. They do not have access to the documents I am mentioning. Even prime ministers do not have access to these documents.

My message is in two parts. I was the guest of a king for two days. A very clever gentleman who had an international law degree. He said that, within 50 or 60 years he would lose the viability of his country through all of these processes. He gave me his personal telephone number and told me to give it to other royalty or heads of government and he would explain the consequences to them if they allow these microwaves in. He promised to tell them king to king.

When I go to a country, I say, put your very best opponents – the people who say I am wrong. Line them up, your best scientists, your best anybody and tell me why I am wrong. That is my message. If you think I'm wrong, get me to your country. Let me show you the documents I have that prove why I am right. I can point to your schools, your population, your nurseries and say, there is the proof. The message is very simple: 58 per cent roughly of the planet are taking avoiding action. 42 are not. You have a choice to be In one of those populations. I work free of charge. I do not accept gifts. I have nothing to gain and everything to lose. I will come and give you the proof and you can then decide. I have the government secret documents and I will put them on your table.

7. 5G SCIENCE

WI-FI TECHNOLOGY—AN UNCONTROLLED GLOBAL EXPERIMENT ON THE HEALTH OF MANKIND

Marko Markov and Yuri G Grigoriev

Article in Electromagnetic Biology and Medicine 32(2):200-8. June 2013:

<https://www.researchgate.net/journal/1536-8386-Electromagnetic-Biology-and-Medicine>

The twenty-first century is marked with exponentially increasing development of technologies that provide wireless communications. To the pollution of the atmosphere with radio and TV signals, not only satellite communications but also any varieties of the Wi-Fi networks are added. By 2010 in the USA, 285 million mobile phone subscribers have been registered (for a little bit more than 300 million inhabitants). The estimate for the world is more than 5 billion mobile phone users at approximately 7 billion people living on this planet. Approximately 2 years ago, the International Agency of Research on Cancer (IARC) classified the electromagnetic fields used in mobile communication as a possible cancerogene. This paper discusses the potential health hazard and lack of scientific assessment and regulatory actions in protection of the life on the planet.

10. SOLUTIONS

"EMR SANCTUARY" - ELECTRO-SENSITIVITY FORUMS AND RESOURCES

A new international online forum "EMR Sanctuary" dedicated to the increasing number of persons affected by electro-sensitivity, or EHS.

www.emraware.com

www.emrsanctuary.com

There are no geographical restrictions upon joining. All that is required is completion of a simple online form. At that time, an anonymous username may be chosen. Subscriber lists will not be used for unrelated purposes.

You are invited to sign up now at www.emrsanctuary.com. Together, we can create sharing and unity of purpose required to successfully promote safer technologies and regulatory standards. Given the arrival of beam-like 5G networks, millions of small cell antennas and thousands of Internet satellites, nothing less than the future well-being of humanity is at stake.

5 membership discussion boards:

General Discussion: Personal stories, appeals. Events, notices, calls to action.

Getaways: Low radiation areas. EMR-free communities, forming. Travel and lodging.

Detection: EMR monitoring, meters, surveys. Tower finding, coverage maps.

Countermeasures: Distance, shielding, architecture. Alternative technologies, hardwiring.

Nutrition, lifestyle.

Technical Q+A: Workings of personal devices, hotspots, towers. Community opposition, strategy.

COMMENT UNDER IAN R CRANE VIDEO

<https://www.youtube.com/watch?v=aspu-mf2-1q>

Planting a seed: educating people about 5G every day

Doug Weall: I took Ian's mantra of planting the seed. I had to go for a body X-ray the other day. When done I asked the nurse, could you please explain something for me. I acted a bit dumb (no change there then eh ?) I am trying to get my head around this 5G that's been rolled out. Have you heard about it ? No I haven't she said. (My theory being that she

deals with radiation so she knows about it already). Well I have heard that us humans can take a limit of say 1 unit and these lamp post transmitters are giving 25 units, she explained that we are subject to an amount already from rock formations etc. So I said that the transmitters are outside of peoples homes permanently. The look on her face was a picture, I do not know anything about this, but I will look into it. That bit was music to my ears. On the way home I thought they are the people who work with it and they are the ones we all should target with the thoughts. So anyone on here who goes for an X-ray just drop the seed in with the folks you see.

11. STATISTICS

ANXIETY, DEPRESSION & DEMENTIA NOW AT EPIDEMIC LEVELS

EMF activist A. Tsang said: Neurological disease and disorders have been increasing at alarming rates. Anxiety, ADHD, depression and autism have been increasing at alarming rates in children, adolescents, and young adults.

What does he means by alarming rates? Let's look at some of the facts he shared:

- 5 to 8 times as many high school and college students meet the criteria for diagnosis of major depression and/or anxiety disorder compared to 50 years ago. This increased psychopathology is NOT the result of changed diagnostic criteria. (1)
- ADHD has increased 53% in the US over the last decade per the CDC. For ages 14 to 17, 19 % of boys and 10% of girls now have ADHD.
- The NIMH (National Institute of Mental Health) reported 25-30% of kids between ages 13-18 will experience an anxiety disorder. This is an increase of 20 fold (i.e. 1900%) over the last 30 years. (2)
- Time Magazine reports that the rate of reported anxiety disorders among U.S. troops jumped 327% between 2000 and 2012. (3)
- The number of American children and adolescents treated for bipolar disorder increased 40-fold from 1994 to 2003 (only a 10-year period). The senior author of the study, Dr. Mark Olfson of the New York State Psychiatric Institute at the Columbia University Medical Center, said, I have been studying trends in mental health services for some time, and this finding really stands out as one of the most striking increases in this short a time. (4)

14. 5G FAKE NEWS

RADIATION IS GOOD FOR YOU? THE FRINGE VIEWPOINT GAINS GROUND IN THE TRUMP ADMINISTRATION

27 February 2019

<https://publicintegrity.org/national-security/radiation-is-good-for-you-the-heretical-view-gains-ground-under-trump/>

The Nuclear Regulatory Commission is considering formal proposals that would abandon current regulations that require licensees, such as the one pictured here, to keep human exposure to radiation as low as reasonably achievable. The Nuclear Regulatory Commission is actively considering claims that low-dose radiation protections should be lifted because exposures make you healthier, a potential boon to radiation-related industries.

FAKE NEWS CNN PRAISES 5G

1 March 2019

<https://digitalsurvivor.uk/2019/03/01/fake-news-cnn-praises-5g/>

US President Donald John Trump has consistently dubbed America's CNN "fake news". Whatever one's thoughts on the man, the broadcaster is certainly lying about 5G.

CNN used the 2019 World Mobile Congress in Barcelona – a four-day event that ended yesterday – as its basis for a glowing article entitled "How 5G will make daily life better".

Writers Nell Lewis and Samuel Burke highlighted how 5G will benefit humanity with driverless cars, can help the world's honey bee population, and finished off with an appraisal of what comes after the dangerous technology has finally irradiated the entire Earth.

DISEASE X is predicted to kill millions of healthy people and it doesn't even exist yet.

By **Sophie Jones** / Published 25th February 2019

DISEASE X is predicted to kill millions of healthy people and it doesn't even exist yet.

<https://www.dailystar.co.uk/news/latest-news/761387/disease-x-to-kill-healthy-people-spanish-flu-world-health-organisation>

RESPONSE TO PHD BIOLOGIST WHO ASSERTS IN EMAIL THAT REPORT ABOUT DEAD BIRDS IN THE HAGUE IS FAKE NEWS

According to this "expert", several nights in a row, hundreds fell out of the trees simultaneously due to starvation in cold weather, and cracked their skulls and broke their necks as they did so

Dear Dr. X

The trouble with lies is that people they make people sceptical. In 1990, at the height of the scare over British beef and Bovine Spongiform Encephalopathy (BSE), a British minister forced his four-year-old daughter to eat a beefburger in order to prove that there was no link with Creutzfeldt-Jakob Disease (CJD)

(http://news.bbc.co.uk/onthisday/hi/dates/stories/may/16/newsid_2913000/2913807.stm).

The link was definitively proved just three years later.

You are a biologist and you say that "Many of the collected birds were found [in The Hague recently during an alleged 5G test] with a broken neck or serious skull damage. Possibly, there has been a calamity due to overpopulation and food competition during that cold period". Hundreds of birds simultaneously falling dead night after night in one spot for these reasons is *not* plausible and millions of thinking people will *not* believe it.

5G is the biggest biological experiment in human history and hundreds of birds falling dead for no apparent reason are the modern canaries in the coalmine. We ignore such signs at our peril.

We know that Silicon Valley tech people do not expose their children to mobile phones and electromagnetic radiation. It is distinctly unhelpful to muddy the waters on 5G by claiming that hundreds of starlings suddenly fall dead simultaneously because they are starving.

Unprecedented bird demise event due to instantaneous mass starvation

15. YOU-COULDN'T-MAKE-IT-UP MOMENTS IN THE 5G CAMPAIGN

MOTOROLA'S 5G PHONE MANUAL RECOMMENDS USERS DON'T TOUCH THE PHONE BECAUSE IT'S TOO DANGEROUS

<https://www.smombiegate.org/motorolas-5g-phone-manual-states-that-beamforming-will-be-dangerous-to-human-skin/>

If I've understood this article correctly, it says that you will have to be 13 times further away from 5G than 4G to have the same level of exposure. And Motorola has fitted its phones with a function that shuts off the signal when they detect human skin in close proximity. This then permits Motorola to provide no test results for those close-proximity exposures on the assumption that they could never happen!

This is a masterpiece of confusionism from the Motorola manual: "this beam-avoidance mechanism is not a fully deterministic guarantee of avoiding user exposure". When you want to confuse, use the longest words with the most syllables. Translated, this means that users are likely to be dangerously exposed to millimetre waves, but Motorola's claim that the device switches off when the user comes too close gives them a nice get-out clause and presumably a clear conscience. One does wonder, though, how it will be possible to use a phone that you have to keep a safe distance from.

What about this as an analogy? *Our new cooker is fantastic and will produce wonderful meals with great convenience. But don't get closer to it than 1 metre because in close proximity to it you will be at risk of serious injury. And by the way, we won't have to publish this information because if you do come into close proximity to it, it will just switch itself off. So go ahead, enjoy using it, but just remember that if, for any reason, the shut-off function stops working and you get injured, it won't be our fault because we guarantee its safety only as long as you keep at a 1 metre distance from it! We had that in our small print but obviously, now that you find yourself in deteriorating health, you didn't bother to read it, you lazy consumer, you!*

By necessity, you have to be in close proximity to a cooker to be able to cook food on it. By definition, you have to be able to hold a mobile phone in order to be able to use it. If it's too dangerous to touch, it seems rather paradoxical, no?

16. UN COMMITTEE ON THE RIGHTS OF THE CHILD: CALL FOR SUBMISSIONS

CONCEPT NOTE FOR A "GENERAL COMMENT ON CHILDREN'S RIGHTS IN RELATION TO THE DIGITAL ENVIRONMENT": CALL FOR SUBMISSIONS

<https://www.ohchr.org/EN/HRBodies/CRC/Pages/GCChildrensRightsRelationDigitalEnvironment.aspx>

The Committee on the Rights of the Child will draft a General Comment on children's rights in relation to the digital environment.

The Committee invites **all interested parties** to comment on the concept note of the General Comment. Submissions are welcome on all aspects of the concept note for the General Comment, with a particular focus on the following:

- The purpose and scope of the General Comment;
- The structure of the General Comment;
- General measures of implementation by State parties needed to realise children's rights in relation to the digital environment;
- Views on the issues and questions raised in the concept note; and
- Suggestions for new issues for inclusion in the General Comment.

In particular, the Committee welcomes relevant research evidence; knowledge of the sector; findings from consultations with children; examples of laws, policies or programmes; or evidence of good practice that would contribute to the drafting process.

All submissions:

- Should be submitted in one of the official languages of the Committee - English, French or Spanish;

- Should be in one concise document focusing explicitly on the implications of the digital environment for the realization of children's rights and **must not exceed 6 pages**;
- Should include a short statement introducing the submitting organization or individual;
- Should be submitted electronically in WORD format to the following email address: crc@ohchr.org;
- Shall **not** be translated; and
- Shall be posted on the Committee's webpage devoted to this draft General Comment.

The deadline for submissions is 15 May 2019. No submissions received after this deadline will be considered or posted on the webpage.

In parallel, consultations with children in diverse contexts across multiple countries, as well as with experts from relevant fields, will be undertaken to ensure that their perspectives are fully reflected in the General Comment. After due consideration of all inputs provided, the Committee will prepare a first draft of the General Comment for additional consultation with relevant stakeholders.

The [concept note](#) is available.

17. HOW YOU CAN USE THE STOP 5G SPACE APPEAL

HOW YOU CAN USE THE APPEAL TO STOP THE ROLLOUT OF 5G IN YOUR COUNTRY

Sign the Appeal

We are asking everyone to sign the [International Appeal to Stop 5G on Earth and in Space](http://www.5gSpaceAppeal.org) (www.5gSpaceAppeal.org). We will succeed in stopping 5G with your help.

Present the Appeal to your government and other authorities

We will be sending the Appeal to the United Nations, the World Health Organization, the Council of Europe and all of the 193 nations of the world and others. We are asking you to print out the Appeal from the website (www.5gSpaceAppeal.org/the-appeal), and present it to the appropriate officials in your national government who are in charge of telecommunications and outer space.

You may also wish to send the Appeal together with a cover letter to:

- Doctors' associations
- Citizens' associations
- National politicians
- National authorities dealing with health and the environment
- Academic institutions and faculties of medicine
- Mayors of major cities
- Political parties
- Parent-children associations
- Head teachers of schools
- National media
- People in the public eye
- 5G satellite companies: [SpaceX](#) (CEO Elon Musk), [WorldVu](#) (OneWeb – CEO Greg Wyler), [Boeing Defense, Space & Security](#) (CEO Leanne Caret), [Telesat Canada](#) (CEO Daniel S. Goldberg) and [Iridium](#) (Chairman of the Board Robert H. Niehaus).

Please also write letters to the relevant people as mentioned in this **Stop 5G Newsletter**. We should all be taking action in response to this information. Letters to the ministers and members of parliament mentioned, as well as to Public Health England, please!

18. HOW YOU CAN HELP THE STOP 5G SPACE APPEAL

HELPING HANDS NEEDED

We need translators and proofreaders for all languages, people who can format documents, copy-editors, researchers, people willing to transcribe recordings and videos, film-makers, IT people, graphic artists and organisers of all sorts to help get this message out. We also need journalists, pro bono lawyers or student lawyers, and national coordinators for each country. If you can help, please contact Claire at stop5gappeal@protonmail.com.

DONATIONS

Well over 20,000 US dollars has been spent on the Stop 5G Space Appeal to date, including website design and maintenance, data processing services, computer time, office supplies, paper, postage, international phone calls, professional translators for certain languages, a part-time assistant, and many other expenses. Until now this has been paid for entirely from sales of Arthur Firstenberg's book, *The Invisible Rainbow: A History of Electricity and Life*, which explains both the historical and scientific background to the present problem. *The Invisible Rainbow* can be purchased at <http://www.cellphonetaskforce.org/buy-the-invisible-rainbow/>. Radio and television announcements, professional lobbyists, and other aspects of a public relations campaign will cost more money than we presently have. Therefore we are asking for donations in any amount (www.5gSpaceAppeal.org/donate). Such donations are tax-deductible in the US. Thank you.

We welcome your contributions to the *Stop 5G Space Appeal Newsletter*.
Please let us know what you are doing to stop 5G in your area.
